

Failed to send the selected EDI message" message when same name

- **Article Type:** General
 - **Product:** Voyager
-

Description:

Getting "failed to send the selected EDI message" when trying to send an EDI PO or Claim with the same name

Resolution:

Voyager does not know whether to append or overwrite the information in the existing file with the newly created file. To prevent taking an action that may be undesirable, Voyager simply refuses to allow the files to have the same name.
