
tab17 for library closed on Saturdays and Sundays in summer

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

Something is very curious about tab17, several of the libraries have everyday in July and August as closed.

An example is of 7CC. They have whole months with a C meaning closed.

Resolution:

When column 2 of tab17 is populated with a specific date, column 3 (day of the week) should be blank. Here are examples from the usm50 tab17:

```
17A 20060501 C
17A #####1225 C
17A #####1226 C
```

This is what I see in the abc50 tab17:

```
7CC 20110701 00 C
7CC 20110702 00 C
7CC 20110703 00 C
7CC 20110704 00 C
7CC 20110705 00 C
7CC 20110706 00 C
7CC 20110707 00 C
7CC 20110708 00 C
7CC 20110709 00 C
7CC 20110710 00 C
...
7CC 20110701 06 C
7CC 20110702 06 C
7CC 20110703 06 C
7CC 20110704 06 C
7CC 20110705 06 C
7CC 20110706 06 C
7CC 20110707 06 C
7CC 20110708 06 C
7CC 20110709 06 C
7CC 20110710 06 C
...
```

I believe that what you are trying to say that 7CC will be closed on Saturdays and Sundays (day "00") in July. This is what you should do for that:

7CC 201107## 00 C
7CC 201107## 06 C

not the preceding.
