## SuDocs call numbers with slash and colon are interfiled

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

SuDocs call numbers with slash ("/") and colon (":") are interfiled.

A number like

A 1.1/6:

files before

A 1.1:

### Resolution:

Delete the "/" from the to\_blank line for the SuDocs tab\_filing entry (xxx01/tab/tab\_filing) (thus, permitting the "/" to be indexed). (You should leave the ":" in the to\_blank, so it continues to be blanked out.)

It should look like this:

```
!* Gov_doc Numbers
26 F del_subfield
26 F to_lower
26 F expand_num
26 F to_blank :-
26 F pack_spaces
```
