

Removing Runtime / At / Library in custom service screen

- **Article Type:** General

Description:

Is it possible to create a custom service form that does not include "Runtime", "At", or "Library"? The XML file for my custom form does not include those parameters, but they appear in the display anyway. The form is at /exlibris/aleph/u20_1/alephe/pc_b_eng/p-custom-hd-01.xml.

Resolution:

The Runtime, Library, Report Language, etc., are ServiceDialog.Static.xxxx values in the ./alephcom/tab/eng/window.dat file on the pc. The text of these labels could be changed or blanked out -- of course this would affect *all* of the submission screens --, but there is no way to prevent the boxes to the right of each label from displaying.
