

Pushing Rosetta PID into Aleph

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

We have been looking through the Rosetta/Aleph synchronization guide to find out how to push the Rosetta PID to Aleph through the x-services call or some other way. We have been able to push the cms id to Aleph successfully and need be able to get the Rosetta PID in there as well. No where in the Rosetta/Aleph synchronization guide does it tell us how do do this. Is this possible? If so, please let us know the steps to make this happen.

Please let us know what we need to do to get this to work.

Resolution:

[From Ex Libris:] Since a CMS record can be mapped to more than one IE, the CMS record does not hold the PID. However, we do provide an API by which you can retrieve a list of PIDs based on a CMS ID. Please see the "Delivery of Multiple IEs (Content Aggregator)" section in the Rosetta-Aleph Synchronization Guide.
