
AIK: Failed to install the COBOL (server express 4.0/5.0) development license

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

I'm getting errors with v20 AIK step 2_7, installing COBOL as root.

Wed Feb 23 14:48:26 EST 2011 Step cob_dev_lic
Install COBOL dev. license as root user

```
=====
Installing COBOL (server express 5.0) development license
Error: Failed to install the COBOL (server express 4.0/5.0) development license
step cob_dev_lic -> Failed
Error: Failed to install Cobol Development license
Wed Feb 23 14:48:28 EST 2011 Step ikit_2_7 [ Failed ]
```

I'm not seeing any more detail than this in other log files.

Resolution:

Try these steps (from the internal the http://swami/wiki/COBOL_License_Installation page):

```
rm -rf /opt/microfocus /var/mfaslmf /var/old_mfaslmf
cd /exlibris/product/cobol5
rm install_cob_rt_lic.tar exlibris64.int autoinstall64 install_cob_rt_lic64_readme
ps -ef |grep mf # Then kill mflm_manager
ipcs -m | grep root | awk '{print $2}' | xargs -t -i{} ipcrm -m {}
```

Then ... re-run the AIK install of the license...

<end paragraph>

That worked -- but it's unclear as to just why this was necessary.
