## ORA-00942 errors for z980 table in xxx60 library

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

I am getting an "ORA-00942 error, table or view does not exist", for the z980 table in abc60. How do I stop this error?

### Resolution:

Any library where you are doing keyword indexing/searching needs to have a z980 table defined. The abc60 library does not.

Copy the z980 definition from the abc01 file\_list to the abc60 file\_list:

```
TAB z980 10M 0K TS2D  
IND z980_id 10M 0K TS2X
```

And then do util a/17/1 for z980 -- make sure it is z980 -- to create it.

---

## Additional Information

z980 table, ORA-00942 error, table or view does not exist
