
RMAN, failure of backup command, Error received from media manager

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

We have received these errors in trying to do an ALEPH/Oracle back-up:

RMAN-03009: failure of backup command on ch4 channel at 02/06/2006 10:36:38

ORA-19502: write error on file "CUNY1641", blockno 50015233 (blocksize=512)

ORA-27030: skgfwrt: sbtwrite2 returned error

ORA-19511: Error received from media manager layer, error text:

ANS1017E (RC-50) Session rejected: TCP/IP connection failure

What might be causing this?

Resolution:

This error usually indicates no more space in the tape or communication disconnection between the tape device and the server.

Additional Information

ORA-19502, ORA-27030, ORA-19511,
