## Column Headings for Each Printed Page?

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

Is it possible to set up our services to have the column identifiers for grids/tables print on each page of the report? For instance, if my p\_item\_07 produces 25 pages of output, is there a way I can set up the form so that the column headings are printed at the top of each page containing that grid?

### Resolution:

This feature is not available.

While, in theory, there is a way to do this (the thead tag), there are 2 problems:

[1] It does not work in current versions of Internet Explorer

[2] The current xsl file structure would require significant rewriting in order to place the thead tag in the correct locations.
