
How to update Z30 information with p_manage_50

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

We try to update Item information (Collection) using p-manage-50.

The main field contains Item barcode, so we expect p-manage-50 to update the collection for this item, that is also included in the main field.

Resolution:

There is special option for Item update, that was not included in the standard p-manage-50.xml.

Please update the p-manage-50.xml file as follows:

```
<argname>F11</argname>
```

```
<label>* Item Record Creation Mode</label>
```

```
[...]
```

```
<cbitem>
```

```
<value>M</value>
```

```
<display>Overwrite Item Information for matching barcode</display>
```

```
</cbitem>
```

and run the p-manage-50 with option "M"

The option "M" overwrites item information if the barcode matches an existing item, or creates a new item if it doesn't.

Additional Information

p-manage-50
