
Two ip addresses in z65_record_key

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 17.01
-

Description:

We see this in the z65 table:

Z65_REC_KEY

GUI-067.151.082.098-192.168.014.080
GUI-067.151.082.098-192.168.014.006
GUI-070.090.023.218-010.010.001.062
GUI-067.151.082.098-192.168.014.145
GUI-070.090.023.218-010.010.001.065
GUI-067.151.082.098-192.168.014.103

Why are there two ip addresses?

Resolution:

The first ip is the firewall address and the second is the internal address of the individual pc.

Additional Information
