

## Parallel library in BIB lines in library\_relation

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 19.01
- 

### Description:

Is it necessary to add a new parallel bib library to the BIB relations in library\_relation:

BIB ABC50 ABC01 ABC30 NDX01  
BIB ABC60 ABC01 ABC30 NDX01

### Resolution:

The "Parallel Indexing" document (Step 2) doesn't say anything about adding the parallel library to the BIB lines.

The BIB line says what bib libraries should display as options for searching when you are in an xxx50 or xxx60. The inclusion of the parallel library here would be confusing and incorrect.

It should be omitted.
