

## Aleph v20 - ISBN searches don't work

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Description:

We have just gone to Aleph version 20. OPAC searches do not yield a result by ISBN (or other numbers).

### Resolution:

The ISBN is a number index. (The 020 field is not included in tab11\_word; it's included in tab11\_ind. When you do a search on ISBN in OPAC it is reading the z11 numeric index table.)

I find that the abc01\_p\_manage\_05.00169 did not complete. This can be seen most clearly in the abc01 \$data\_scratch/p\_manage\_05.cycles file. It shows that most of the cycles were not completed.

I suggest that you resubmit the abc01 p\_manage\_05 right now.
