

fix_doc_035_sdln

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

We are looking at the STP 000657 information and we would like to know if it possible to have an example for the following line:

fix_doc_035_sdln - SDLN special fix for tag 035 based on 001

Meaning where is the example of 035?

Resolution:

This fix normalizes 035 from 001 - It deletes the leading characters (e.g. ocm) and adds leading zeros.

Additional Information

fix, fix_doc_035_sdln, SDLN, 035, 001
