

Are z40, z41, z43, z45 and z46 obsolete in V20?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

The following tables and their indexes were in V19 \$aleph_dev/aleph/tab/file_list.ADM but are not in V20 file_list.ADM:

z40, z41, z43, z45, z46

Should these tables and indexes be dropped from the xxu50 library in V20?

Resolution:

Yes, these tables and indexes should be removed from the v20 xxx50 file list.

Since there is no utility in Aleph which drops a table and doesn't recreate it, you would need to use SQL to actually delete the table (and its indexes).
