

## p-cir-32.xml: z40 vs. z410

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 19.01

---

### Description:

There is a change from v18 to v19 in this job it seems. The change I see between versions is

Version 18: "Update ILL Patron Requests Table (Z40)"

Version 19: "Update ILL Patron Requests Table (Z410)"

And yet, in v19, the parameters at the bottom still say Z40. So if the ILL request are now in Z410 instead of Z40, shouldn't the parameters at the bottom of the file have changed as well? And are the ILL requests now in Z410 instead of Z40?

V19: aleph/pc\_b\_eng/p-cir-32.xml

```

```
<!-- Param: P-SUB-LIBRARY-FILTER X(1000). F08 -->
```

```
<!-- Param: P-UPDATE-Z37H X(1). F09 -->
```

```
<!-- Param: P-UPDATE-Z35 X(1). F10 -->
```

```
<!-- Param: P-UPDATE-Z40 X(1). F11 --> Should this have changed to Z410?
```

```
<!-- Param: P-UPDATE-Z68 X(1). F12 -->
```

<!-- Param: P-UPDATE-Z309 X(1). F13 -->

Resolution:

The mentioned line in the service is the internal variable NAME which was not changed from z40 to z410. The logic of the program was changed and there is no functional problem.
