
Control-center" needed on Linux-machines?

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 20

Description:

I am installing Aleph 20 on Red Hat Linux 5.0 64 Bit using AIK. During Pre-Installation-Checks I am getting error message because of missing "control-center". Can you explain why this interface is needed? We would prefer not to install it.

Resolution:

This interface is needed for Oracle SW installation, which is part of Aleph installation.
