
PDS Error

- **Article Type:** General
 - **Product:** MetaLib
 - **Product Version:** 3
-

Description:

I have the following error in the pds_server.log :

ServiceHandle failed = 11

What can I do to find the source of this problem ?

Resolution:

The problem is due to an incorrect change in the PDS password.

The password must be changed in the tab_service.institute file as well as in the ./dat01/tab/tab_management table.

Following are instructions for changing the PDS password:

Change the PDS password entered in the 'tab_management' table as follows:

```
>> dlib dat01
```

```
>> dt
```

```
>> vi tab_management
```

Change the password in Col. 2

```
1 2 3 4 5
```

```
pds 1234 Y METALIB pds
```

After changing this file, rerun www_m server:

```
>> start_w
```

In addition add the following to ./pds/conf_table/tab_service.institute :

```
INSTITUTE-CODE CITYUNIV
```

```
SERVICES AUTHENTICATE
```

```
PROGRAM-NAME metalib_x_server.pl www.myuni.com,8334,BOR-AUTH,N,pds,1234
```

```
END
```

Where "pds" is the username and "1234" is the new password

Note that if NO username & password have been added, then the default values (pds / pds) are understood.

Additional Information

PDS,password,
