-

Description:

What services are there for Circulation statistics?

Resolution:

In Circ GUI > Services > Statistics there are General Circulation Statistics (cir-30) and Circulation Statistics by Activity Type (cir-31).

The p_cir_30 service produces a statistical report that includes all important circulation activities (Loans, Renewals, Holds and Returns) on one report.

For p_cir_31, the customer chooses the specific activity on which the report should be run. The p_cir_31 Help is being corrected to say: "This service produces a statistical report for a particular circulation activity (Loans, Renewals, Holds, Bookings or Returns). The report includes statistics only for the activity you select. If you want all activities to be on the same report, you should run the p_cir_30 Service instead. Note that this p_cir_31 Service includes Bookings statistics, which p_cir_30 does not."

See also Services > Reports > Claimed Returned Items Report (cir-19). This service produces a report of items on loan that were claimed to have been returned by the patron.
