
tab38 Does Not Display *ALL* Pickup Locations

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

When a patron places photocopy request, only the first 10 pickup locations defined in tab38 are displayed in 'Pickup/delivery location', 'Create Photocopy Request' form .

Why?

Resolution:

If there are more than 10 pickup locations for the library in tab38, each new line in tab38 should include values in col.1(Source sublibrary),col.2 (Source item status),col.3 (Patron status).

The incorrect set-up is:

```
TARCV ## ## TARCV LABEL TRLEC TRDOC TRDOC CMB DYL PDG TEDUC  
TESTA THLTH TLAW SCLLL TRTST TSTRT TUPTN REG
```

The correct format is:

```
TARCV ## ## TARCV LABEL TRLEC TRDOC TRDOC CMB DYL PDG TEDUC  
TARCV ## ## TESTA THLTH TLAW SCLLL TRTST TSTRT TUPTN REG
```

Additional Information

photocopy request, pickup location, tab38
