 - **Product Version:** 16.02
-

Description:

In items function, the drop downs for sub-library, material type, item status and collection are displayed with only one column - only the code is displayed, the text related to the code is not. Also, when I perform util x 7 to clean utf_files, the info coming from pc_tab_sear in ulb01 is not displayed also.

what must I check/configure for utf_files to work?

Resolution:

The problem was in pc_tab_col.LNG of the BIB library. The customer has setup the lines in PC_TABLE to display only one column. The percentage of column 5 was setup to 100 to display the field CODE and it was 000 to display field INFO.

Additional Information

pc_tab_sear, drop down menu, sublibrary, material, collection
