

## Label button in Serials module Items List

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 15.5
- 

### Description:

In this version there is no "Label" button in the Items List of the Serials module like there is in the Items module.

Has this been corrected in subsequent versions? We want to use a label print program for the arrival of serial issues which requires the Label button. I cannot find such a button but wondered if there was a table setting that needed to be activated.

### Resolution:

The Label button is available in version 16 and later. It is possible to print labels in Serials both from the Check-In node, and the Items node.

---

## Additional Information

label button, serials check in, items
