## Library List in ALEPHADM Tables Navigator

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

How do I remove libraries from the list in ALEPHADM Tables Navigator?

Currently USM01, USR00 and something called "General Patron" appear and, if possible, I would like to remove or hide them.

Also, is it possible to change the order in which the libraries appear?

### Resolution:

The list of libraries and its order is given by the line PAS from the library\_relation table from \$alephe\_tab

---

## Additional Information

library, ALEPHADM, tables navigator, PAS, library\_relation
