

disallowed characters for invoice number field

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

Are there any characters that Aleph does NOT allow in the Invoice Number field, for both manual entry and in batch loading?

Resolution:

I couldn't find any documentation on this,... but I am able to include various punctuation and diacritics as part of the Invoice number -- and the characters are stored and subsequently display as part of the number.
