

Indexing - p_manage_01 - Write error

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

I attempted to run the indexing routine p_manage_01. We got "Write error":

29030 READING DOC 000879029 AT 08:27:28

30031 READING DOC 000880030 AT 08:39:24

Write Error

Write Error

<etc.>

Resolution:

At this stage, the p_manage_01 job is reading the bib records and writing work records to the manage_01_a files in \$data_scratch. The xxx01 \$data_scratch was out of space. This is described in the "How To Run Index Jobs" document, Section 9, "Sort Errors".

Additional Information

Write error, indexing
