
How to update the Format Registry ID (PUID)?

- **Article Type:** General
- **Product:** Rosetta
- **Product Version:** 3.1

Desired Outcome Goal:

To update the Format Registry ID (PUID) that DROID provides.

Procedure:

1. Create a set of IEs (intellectual entities) for update from Data Management > Manage Sets and Processes > Set List
2. Run the validation stack on the set of IEs from Data Management > Manage Sets and Processes > Process List > The validation stack will update the PUID.

Category: Preservation

Subject: Server Processing
