## p-file-90 log stops recording after 1429 records

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Description:

I recently ran p\_file\_90 for a file of over 4,000 records. Everything appears to have been created properly when I look in the client, but the log stopped reporting after 1,429 records, making it look like the load did not finish.

### Resolution:

Checking the last-doc-number showed that the entire file was loaded (4,036 records), but we found that there is a limit for number of the report lines that can be written in the log file.

This issue is still open and was escalated to Development for further investigation <2011-04-10 01:00:03>.

This was fixed in v. 20 by rep\_change #3521
