

General ILS failure" in RESTful API, service patron

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

We are implementing Primo-Aleph-interface using RESTful API.

It does not work correctly. When we try in Browser to call up `http://<server>:1891/rest-dlf/patron/ABC0001` we get:

```
<get-patron>
```

```
<reply-text>General ILS failure</reply-text>
```

```
<reply-code>0100</reply-code>
```

```
</get-patron>
```

Resolution:

We see that in your `usr_library PWD00` in `tab100` you have `DOC-TYPE-ADM=Y`

After changing this to

```
DOC-TYPE-ADM=N
```

it works correctly.
