

Card format missing location details when emailed

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

Have modified edit_doc.eng and edit_paragraph.eng to include the location information on the “Card format”. It works fine on the Full view of Record. However, the location did not show up when you sent the selected records via email(Save/Mail).

The line added to edit_doc.eng is:

037 Location: 116

The line added to edit_paragraph.eng is:

116 PST# L ##

Resolution:

You have to add the following lines in tab_expand

WEB-SAVE expand_doc_bib_loc_usm

WEB-MAIL expand_doc_bib_loc_usm
