
Error: Load: ../tab03" -- a problem?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

We see this error in our p_manage_01 log files and in other log files:

```
Error: Load: /tmp/utf_files/exlibris/aleph/u16_1/odn04/tab/tab03
```

Is this a problem?

Resolution:

The tab03 (stopwords) table is completely optional. There is no tab03 in the usm01 \$data_tab and most libraries do not have this table. Its absence does **not** cause any problem.

Additional Information

tab03
