

## Categories questions

- **Article Type:** General
  - **Product:** MetaLib
  - **Product Version:** 3
- 

### Description:

1. Can I directly assign databases to the MetaLib-generated ALL sub-category and expect them to display?
2. If I choose not to display a sub-category, will a database assigned uniquely to that sub-category be included in the MetaLib-generated ALL sub-category?

### Resolution:

1. No, you cannot directly assign databases to the MetaLib-generated ALL sub-category and expect them to display because they are automatically generated by the system from scratch.
  2. If you choose not to display a sub-category, the database assigned uniquely to that sub-category will NOT be included in the MetaLib-generated ALL sub-category.
