

Parameter name for the PDS handle case sensitive

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

Problem Description:Parameter name for the PDS handle case sensitive. Example files in /exlibris/aleph/a20_3/pds/html_form/global/load-login* should be corrected.

Actual Results:

Using the syntax:

```
var url = "http://ram47:13002/pds?func=ping-remote-login&" +  
"calling_system=$0100&" +  
"institute=$0200&" +  
"PDS_HANDLE=$0300&" +  
"url=$0400";
```

The generic PDS login page was displayed, not the customer specific login page.

Expected Results:

Using the syntax:

```
var url = "http://ram47:13002/pds?func=ping-remote-login&" +  
"calling_system=$0100&" +  
"institute=$0200&" +  
"pds_handle=$0300&" +  
"url=$0400";
```

The customer specific login page was displayed.
