## Negative or Full" message when running p\_manage\_32

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

When we ran p\_manage\_32 (on development), we got the following messages:

Base AAA1 is either NEGATIVE or FULL !!! Base Ignored  
Base BBB2 is either NEGATIVE or FULL !!! Base Ignored  
Base CCC3 is either NEGATIVE or FULL !!! Base Ignored

When we had previously run UTIL-H-1-10, the reports on those bases were:

BBB2 |NEGATIVE BASE| No | Yes | \*\*\* Err \*\*\*

CCC3 | 2235| Yes | Yes |

AAA1 | 122992| Yes | Yes |

We understand the problem with BBB2, but have no idea why CCC3 and AAA1 were rejected.

### Resolution:

The MAP-COUNT in the ./butil/b\_build\_cycle\_table\_base program is negative -- because the wtp filters in the tab\_base.eng entries for these bases didn't exist. (The situation was also complicated by the fact that there were two databases: the regular ABC01 and ABC02, being used for parallel indexing.)
