## unable to extend segment by 1024 in undo tablespace 'UNDOTS'

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Description:

We have 4 million bib records. We are getting the following errors in running indexing jobs:

Oracle error: io\_z103\_write

ORA-30036: unable to extend segment by 1024 in undo tablespace 'UNDOTS'

40041 READING DOC 003940040 AT 04:02:17

I resized the UNDOTS1 tablespace to 2G while the jobs are running. It is now using approximately 78 percent of the UNDOTS1, and it is growing. We're running p\_manage\_12 and p\_cir\_25 right now.

Is the UNDOTS sized correctly? And do I need to increase the undo retention from 10800 to ??

### Resolution:

Yes, with your size of database and the amount of ADM, you should increase the UNDO TS. Please double its size to 4GB.

You should not need to increase undo retention.
