
Including physical delivery address details in Web ILL Lending Request Details

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

How can I include physical delivery address details in the Request Details display for incoming ILL requests?

Requests received from KDD for physical delivery contain the following details which do not display on the Request Details tab and do not seem to be mapped to tags:

```
ILL L $$aIllRequest.DeliveryAddress.PostalAddress.Name.Person$$bNatasha Simons
ILL L $$aIllRequest.DeliveryAddress.PostalAddress.ExtendedDeliveryAddress$$bKinetica - National Library of Australia
ILL L $$aIllRequest.DeliveryAddress.PostalAddress.StreetAndNumber$$bParkes Place
ILL L $$aIllRequest.DeliveryAddress.PostalAddress.PostOfficeBox$$bPO Box
ILL L $$aIllRequest.DeliveryAddress.PostalAddress.City$$bParkes, Canberra
ILL L $$aIllRequest.DeliveryAddress.PostalAddress.Region$$bACT
ILL L $$aIllRequest.DeliveryAddress.PostalAddress.Country$$bAustralia
ILL L $$aIllRequest.DeliveryAddress.PostalAddress.PostalCode$$b2600
```

The following line is mapped to tag 46201 and can be included in Request Details display via `</ill library>/tab/ill_edit_doc_in.eng`:

```
ILL L $$aIllRequest.DeliveryService.PhysicalDelivery$$bPostal Delivery
46201 L $$aPostal Delivery
```

Resolution:

1. This information present in tab3 (Requester) and cannot be added to Request details tab.
2. It can be printed on `www-ill-in-print-01.xsl` by adding z700 information to the template, for example:

```
<xsl:call-template name="display-gen">
<xsl:with-param name="label" select="Borrowing Library Address"/>
<xsl:with-param name="value" select="./z700-address-street-no"/>
</xsl:call-template>
```

Additional Information

delivery address, Request Details, incoming ILL requests, `www-ill-in-print.xsl`
