## Circ.ini ErrorAction Descriptions

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 16.02
- 

### Description:

Please explain the ErrorActions – when would we see them?

### Resolution:

Some of the ErrorActions are explained below (they are all listed). See SKB-8192-2135 for customization instructions.

### ClaimReturn

### ItemError

ItemRequested = Activated in Loan tab > Loan session > when loaning item for which hold request exists for other patron (if tab\_check\_circ has 6\_a defined, NO warning sounds).

ItemTransfer = Activated in Return tab > Return session > item needs to be transferred to other sub-library.

LoanDenied = Activated when the station is denied from performing loan according to tab\_attr\_sub\_library.

LoanError = Activated in Loan tab > when loaning item and in the middle of the operation there is an error from the server, such as connection error or timeout.

### LoanSuccess

### LostReturn

### NoBorrower

NoUser = Activated in Loan tab > Select any Patron > press New Cash button > Cash updated > system goes to server and brings updated patron info. If there is any error while bringing patron information from the server (e.g., connection problems, timeout, or data problems) a warning will sound.

### OnHold

OnHoldReturn = added by v18 rep\_change # 00174. Performed when an item on hold is returned in Circulation.

RemoteReturn = should be activated in Return Tab when returning item from Remote Storage.

ReturnDenied = Activated when the station is denied from performing a return according to tab\_attr\_sub\_library.

ReturnError = Activated in Return tab > when returning item and in the middle of the operation there is an error from the server, such as connection error or timeout.

ReturnILLend = should be activated in Return Tab when returning library's item from ILL Lend.

ReturnSuccess

UserError = Activated in Loan tab > Loan session > when system gets patron info and there are blocks, limits or cash owed.

UserVerification = (Loan Options, Patron Verification Required check is selected.) Activated in Loan tab > when patron selected, system requests patron verification. If verification wrong, warning sounds.
