## ILL2 Bibliographic Information in the Supplier Letter

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Description:

In the supplier letter (ill-send-request-letter) there's no explanation to the Lending site about what the numbers for the volume, issue, etc. mean. For example, if I generate a letter for request 123, here's the bib-info:

5555-6666

British journal of Middle Eastern studies.

Science Direct

Test of the test test test.

2003 01

9

1

50-55

This represents v.9:1 (Jan.2003), pages 50-55, but there's no description to make that clear.

### Resolution:

I would suggest implementing the following section in adm40/tab/edit\_field.eng:

1 # ISS## D

2 y A Year:^ ^

2 m A Month:^ ^

2 d A Day:^

2 v A Vol.:^

2 i A Issue:^

2 p A Pages:^

The supplier letter will then look like this:

Year: 2003 Month: 01

Vol: 9

Issue: 1

Pages: 50-55

---

## Additional Information

ILL2 bib-info supplier letter
