## RIS/Reworks Output Format Problems

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01, 21, 22, 23
- 

### Description:

I am trying to get export to Refworks (ISI Research Tagged Output Format) functioning. It works fine, except that on a lot of items I get two PY lines (PY 008## 0008).

Where is the second line coming from? There's only one 008 entry in the record.

Reworks is processing a second line and is picking up 0000 as the year for these records.

Sample output, `www-set-mail-777-00`, and `edit_doc_777` are below.

#### SAMPLE OUTPUT

TY - BOOK

AU - Cumfer, Cynthia.

TI - Separate peoples, one land : the minds of Cherokees, Blacks, and Whites on the Tennessee frontier / Cynthia Cumfer.

PY - 2007

## Resolution:

The problem was caused by entries in tab\_expand for WEB-MAIL. The Refworks export uses the short-mail as part of the process.

There may also be related entries in tab\_expand under E-DOC-777.
