
Syndetic links in Brief View

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

We've set up a Syndetics link in Full View but would like to add it to brief view as other Aleph users have done. We've tried adding the ICON field to www_tab_short.eng and amending short-a-head-abc01 and short-a-body-abc01 accordingly, but although we can get a column headed 'Cover' to appear, we can't get any actual cover images.

Resolution:

It doesn't work like you describe. You need to do the following:

1) Change the abc01 www_tab_short.eng:

From:

```
8 L Cover 00 00 0100 U ## ICON
```

To:

```
8 L Cover 00 00 0100 U ## 020
```

2) Change \$alephe_root/www_f_eng/short-a-body-abc01

From:

```
<td $2800 nowrap>$0800</td>
```

To:

```
<td class=td8 $2800 nowrap><a href='javascript:open_window_ext("https://syndetics.com/index.aspx?isbn=$0800/index.html&client=uniwest&type=xw12");'></a></td>
```

In Summary, this change will take the ISBN data from www_tab_short.eng file to the \$0800 placeholder in short-a-body-abc01 file. This will allow the queries to work based on ISBN of the ALEPH records.
