
ue_01: Error loading /tab_xyz

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

Just noticed that the ABC60 run_e_01 gets an error while attempting to load /aleph/aleph/u16_1/cun60/tab/tab_xyz, which doesn't exist.

Resolution:

The tab_xyz is optional and not relevant to an HOL library. You can either ignore the message or, to prevent it, add an empty tab_xyz to the ./xxx60/tab/ directory. (It can be copied from the ./xxx01/tab/ directory.)

The same is true of an ADM or Course Reserve library.

Additional Information

tab_xyz, faq
