Description:

When connecting to the GUI screen we get Remote error (global-94) "Remote File is empty".

Resolution:

This was resolved by clearing the utf_files with UTIL/x/7.

We also noticed that the GUI screens had "Dummy heading"s and "Error xxxx Not defined in file pc_XXX_xx" or Not Found messages. The /tmp disk was full a day before, and this was the cause of the problem.

Additional Information

Remote file is empty (global-94), utf_files,
