
WebV: Select All Print fails in the Course Reserve

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 8.2.1
-

Description:

Bug Report Form for Issue 16384-9553

Module(s): WebVoy?ge

Server platform(s) affected: Tested on Solaris

PC OS (if applicable): N/A

Browser & version (if applicable): All Supported Browsers

Release(s) replicated in: 7.x.x

Last version without bug (if applicable): 6.5.4

Expected results:

The ability to print all records from a course reserve list.

Actual results:

Using the "Select All" function while on the course reserve page will not allow you to print the selected records.

Workflow implications: Patrons are not able to print a course reserve list if the records span more than one page in the OPAC

Replication steps:

1. Load the OPAC and go the Course Reserve page
2. Bring up any reserve list
3. Click the "Select All" checkbox
4. Click on Print
5. The subsequent page where you chose printing options will show that no records are selected

Other information: There is a very similar issue in the OPAC with the "select all" button not always picking up on the list of selected items. See issue -9441

Workaround: If the results set fits onto one page in the OPAC, the "Select Page" function works just fine. Otherwise, there is no workaround.

Resolution:

Fixed in Voyager 8.2.1
