
turning off innodb in mysql

- **Article Type:** General
 - **Product:** SFX
 - **Product Version:** 3
-

Description:

one of the mysql engines, innodb, is not being used by the SFX application. can we turn off innodb and how?

Resolution:

You can disable InnoDB in mysql. To do this, edit the my.cnf file in the directory /exlibris/sfx_ver/sfx_version_3/data/ and add the following line to the [mysqld] section:

```
skip-innodb
```

You will need to restart mysql for this change to take effect.

Additional Information

innodb,mysql,restart
