

Address is the adm library, not the patron's home library

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

When sending a letter to patron from Circulation GUI client, Global patron record, the sub library address (through tab_sub_library_address.[Ing]) is taken only from ADM library level, not from sub-library level (which appears in the patron home library.)

Resolution:

v18. rc 1936

No need for higher versions (already done).
