
Utility to view p_file_20 input records

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
-

Description:

We are getting errors in p_file_20 trying to load particular patron records. The input file as displayed in the abc50 \$data_scratch is just one big long string and difficult to decipher. Is there a better way to check the PLIF input file?

Resolution:

util f/2/5/1 ("Display PLIF Records from Sequential File") can be used to check a PLIF input file. Let's say that you see the following in the \$alephe_scratch p_file_20 log:

```
Error (b_file_20_chk_edit_record) : Errors in Z303. Record No 000024
Number of Errors = 02
Load: /exlibris/aleph/u17_1/utf_files/exlibris/aleph/u17_1/alephe/error_eng/check_z303
Error 0201 : Z303-ILL-LIBRARY is not valid (check tab_sub_library)
Error 0212 : Z303-HOME-LIBRARY is invalid (check tab_sub_library)
```

You can do util f/2/5/1 to see the formatted input record. (You enter in the "Record No" as the "line number"):

Enter file name in scratch directory (or q to exit)

file name: student_ads.txt

Enter line number (CR cont, Q quit) : 24

*** Line no.: 000000024

MATCH-ID..... R00269694

Matched on
ID..... ID74957
NAME..... Smith, Paula

Note: this utility works only with the Sequential format input file, not the XML; the XML file, having the XML label for each field, does not really need it.
