## circulation notices not generated

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 14.2
- 

### Description:

Our circulation notices, overdue, recalls and cash due were not generated this morning. When I check UTIL-C-7, I can see that the jobs are in a state of "Holding until 11/22/2005 00".

Why is this happening?

### Resolution:

UTIL-C-1 showed that the p\_acq\_13 job never completed. Thus, the p\_cir\_51 circulation notice job, which was queued up behind it, was still waiting.

The p\_acq\_13 log (\$alephe\_scratch/new50\_p\_acq\_13.00990) looks like this:

```
start NEW50,941,NEWMN,112105cp.epo
```

```
ps -ef | grep acq_13 showed that there were two processes still active for acq_13.
```

I "kill"ed these processes, after which the jobs which were waiting (p\_cir\_01, p\_cir\_51, p\_cir\_13, and pc\_cash\_05) ran in quick succession.

---

## Additional Information

util/c/7, p\_acq\_13
