
Incorrect due times after loading Service Pack 1371

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Description:

We installed service pack 1371 this morning and discovered that the system is setting the due time for all loans (except advance bookable items) to 00:00.

The due date is being set correctly, but instead of the due time being set to 23:59 as in tab16, it is being set to 00:00, which means the items will become overdue a day too early!

How can this be corrected?

Resolution:

This happened because you had a Z301 table built for your QML sublibrary prior to running the service pack.

Additional Information

due time, loan, due date, overdue
