

Strange characters displayed instead of day of week (for French)

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Description:

There are problems with the display of the opening day. Strange characters are displayed instead of the day of the week (e.g. lundi, mardi, mercredi, etc.). We have the same problem in the Web OPAC.

The display is OK when we set the GUI in English, but not in French.

Attached is a Word document with screen shots.

Resolution:

FRE" lines need to be added to the \$alephe_tab/tab_days. It has ENG, HEB, and GER, but no FRE.
