
SIP2 server startup

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 17.01

Description:

The document 'How to Set Up a SIP2 Server for Self-Check Systems' indicates that the following must be included in aleph_start:

```
setenv SIP2_STARTUP_LIBS "usm50"
```

However, this didn't work for us.

Resolution:

What is actually needed is that the local ABC50 library be included in aleph_start.private:

```
setenv SIP2_STARTUP_LIBS "ABC50"
```

Additional Information

SIP2 server startup aleph_start
