## Preventing renewal of overdue items

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Description:

We had someone renew overdue items today. I thought I had that disabled. Looking over tab\_block\_circ:

```
ABC50 51 ##### 01 999999.99
ABC50 54 ##### 01 250.00
ABC50 57 ##### 01 10.00
ABC50 58 ##### 01 10.00
ABC50 ## ##### 01 150.00
!ABC50 ## ##### 05 04 10000
```

Column four is blank. Would I need to make it 00 to stop online renewals of overdues or am I reading the manual wrong?

### Resolution:

If you want 1 overdue to block the loan, you would specify "01" tab\_block\_circ, col. 4\*.

To make this be used, you need to have check\_circ\_9\_a and/or check\_circ\_9\_b specified for the Renew labels in tab\_check\_circ:

```
RENEW-GBL check_circ_9_a
RENEW-GBL check_circ_9_b
RENEW check_circ_9_a
RENEW check_circ_9_b
RENEW-WWW check_circ_9_a
RENEW-WWW check_circ_9_b
RENEW-W-G check_circ_9_a
RENEW-W-G check_circ_9_b
X-RNW check_circ_9_a
X-RNW check_circ_9_b
```

Note: Since you have "#####" as the sublibrary in col. 3, check\_circ\_9\_a and check\_circ\_9\_b will have the same effect. You can specify one or the other; don't need to specify both....

Then restart the pc\_server and/or the www\_server.

\*Internal Note: In the check\_circ\_tab\_block\_item program: IF NO-OVERDUE NOT < TAB-BLOCK-NO-OVERDUE (1) [then block due to overdues]
